Four magnets secure
the panel within the
furniture's structure.

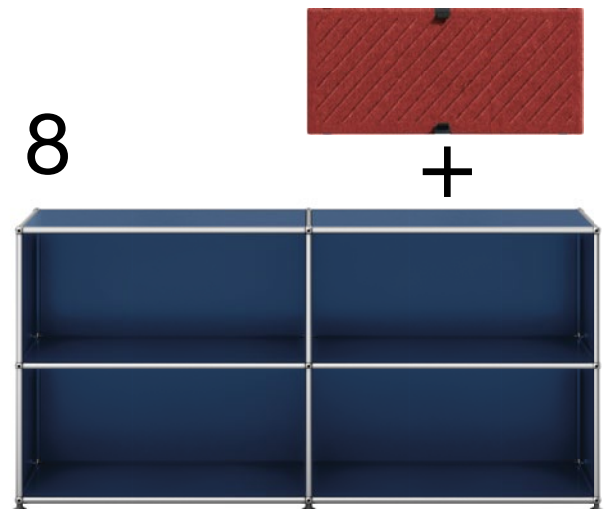

Two tabs make it
easy to flip the panel
up or down.

USM Haller Soft Panel

The new USM Haller Soft Panels add a playful, tactile dimension to the USM range. The textile panels come with four magnets and can be easily clicked into the tubular structure of the modular furniture system – no assembly or additional fixtures required. It's just as easy to fold them up or down to open and flip into the next compartment. And of course you can turn things round at any time or position them somewhere else in the furniture.

The panels can also
be ordered individually
and clicked into
any piece of furniture.
