

USM Haller Soft Panel

Playfully change appearances and functions thanks to magnets.

Play with patterns and colours to create your own piece of art.

Add warm accents into the metallic structure.

Place panels freely to transform the overall look at any time.

A soft touch to the classic

Polyester fleece
with 40% recycled
marine plastic content

The new USM Haller Soft Panel adds a soft and playful touch to the USM product range. The textile panels come with four magnets and can be easily clicked into the tubular structure of the modular furniture system – no assembly or additional fixtures required. It's just as easy to flip them up or down to open and move into the next compartment. And of course, you can turn things round at any time or position them somewhere else in the furniture.

Easy

The lightweight panels are easy to attach and move, with no assembly or additional equipment. That's why they're ideal for giving existing furniture a fresh twist.

Soft

The USM Haller Soft Panel is made from high-quality synthetic fibre, with 40% recycled marine plastic. Lightweight, stable, and with renowned USM durability, the panels are soft to the touch and offer a warm aesthetic – a surprising contrast in the metallic world of the classic design. Another special feature: the panels reduce noise and improve the room acoustics. This is typical USM: design, functionality and sustainability in perfect harmony.

Playful

The furniture's aesthetics and functionality are transformed in the blink of an eye, adapting to your mood or changing needs. Patterns and colours can be combined like pieces of a jigsaw puzzle to form a cohesive overall look or an eclectic mix. Flip – one moment it's bright orange. Flap – now your furniture is transformed into an elegant red with a vertical pattern. Every flip brings a new change in design.

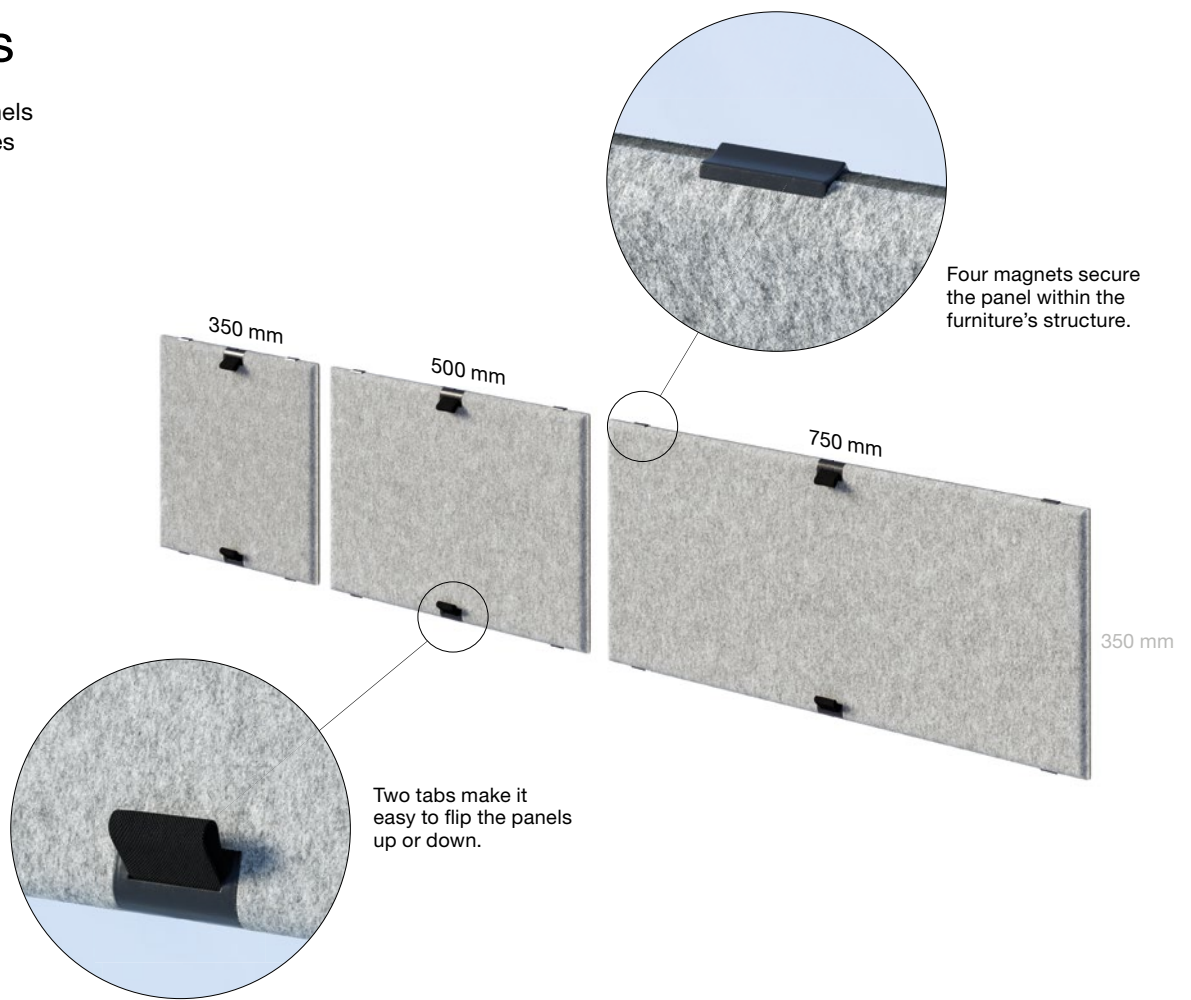

Dimensions

The USM Haller Soft Panels are available in three sizes to fit the most common USM Haller dimensions.

- 750 × 350 mm
- 500 × 350 mm
- 350 × 350 mm

Smaller panels can be slid horizontally in larger modules.

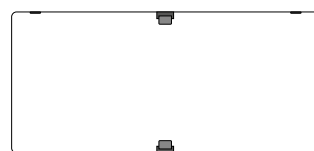

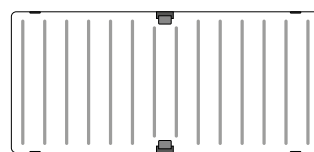

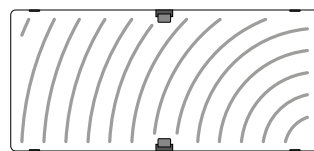

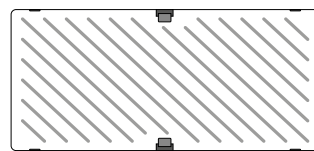

Patterns and colours

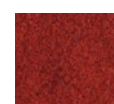

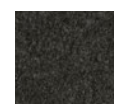

There are three patterns to choose from: diagonal, curved and vertical grooves.

The Mono Panels are designed with the same pattern on both sides (either diagonal or curved grooves) and in a single colour.

Duo Panels have vertical grooves on one side, are plain on the back and available in various colour combinations.
