# USM Privacy Panels

USM Privacy Panels are a flexible and extendable modular system made up of individual panel units. Each panel unit consists of two layers of molded polyester fabric with a tubular crossbeam. They can be used in a free-standing version or mounted on tables to divide up the work space, ensure privacy and absorb unwanted noise.

The panels are available in two sizes, a smaller version measuring 250 × 350 mm and a larger version measuring 750 × 350 mm. These dimensions are chosen to match those of the USM Haller system and tables as well as USM Kitos desks. All measurements refer to the distance between axes.
